

technical data sheet

BOSTIK INSTANT-PRO™ SYNTHETIC TURF ADHESIVE

DESCRIPTION

Bostik Instant-Pro™ Synthetic Turf Adhesive is a solvent based synthetic grass and external sports surface glue.

RECOMMENDED USES

Bostik Instant-Pro™ Synthetic Turf Adhesive is specifically formulated to bond hessian or open weave polypropylene backed synthetic grass to concrete, exterior grade timber and paved surfaces for interior and exterior conditions. Ideal for use around swimming pools, balconies and other out-door recreational areas.

LIMITATIONS

NOT recommended for constantly wet or submerged surfaces. Because of the wide range of synthetic sports surfaces, a small test area should be carried out to determine the suitability of Bostik Instant-Pro™ Synthetic Turf Adhesive.

FEATURES & BENEFITS

- Excellent water resistance
- High early bond strength with aggressive tack to aid in installation
- Easy spreading, fast drying
- Early bond strength prevents edge curling

TYPICAL PROPERTIES

Base	Synthetic Rubber
Colour	Green
Consistency	Fluid Paste
Coverage	Approx 2 m ² per litre (3mm notched trowel)
Working Time	Approx. 10 mins.
Trafficable	Light; 24 hours, Heavy; 4-7 Days
Cure Time	Full Cure after 7 days

PACKAGING

Available in 4L and 10L pails

APPLICATION INSTRUCTIONS

Preparation

Ensure surfaces are dry, sound and free from dirt, dust, grease, oil, wax, paint and any loose or flaking materials. If applying over concrete, ensure concrete is fully cured and free from moisture and surface salts. A very porous surface should be primed first with Bostik Instant Pro™ Primer.

Application

1. Apply glue evenly to the prepared surface (not synthetic grass/turf) using a 3mm U notched trowel. Although a 3mm trowel is usually sufficient in most applications, it may be necessary to use a larger trowel for uneven or rough surfaces.
2. Do not spread more glue than can be laid before glue skins (usually 5 mins depending on temperature).
3. Allow the glue to tack up (10-15 mins.) before laying in the synthetic surface. This can be determined by placing a small piece of the synthetic surface into the glue and removing, observing for signs of stringiness and grab.
4. The glue must be allowed to develop some grab before laying. Lay the synthetic surface into the wet glue to ensure good transfer and roll to remove any air entrapment.

Remove excess glue immediately with a cloth moistened with Mineral Turps. Do not allow heavy traffic for 24 hours.

HEALTH AND SAFETY

Avoid contact with eyes and skin, wear solvent resistant gloves, and safety glasses with slide shields. Avoid breathing vapours, use in well ventilated areas. Wear an organic vapour respirator where ventilation is poor or inadequate. Refer to the Material Safety Data Sheet for more detailed information.

SHELF LIFE

Minimum of 12 months in original unopened containers if stored at temperatures between 10°C and 30°C

STORAGE

Bostik Instant Pro™ Synthetic Turf Adhesive should be stored away from flames and possible ignition sources. Store in a cool, well-ventilated area, out of direct sunlight.

CLEAN UP

Clean up tools and excess glue with mineral turps, whilst glue is still wet.
